Electrical World

A Review of Current Progress in Electricity
and Its Practical Applications

Volume LXXV

January 3 to June 26, 1920

McGRAW-HILL COMPANY, Inc.
Tenth Avenue and Thirty-sixth Street
NEW YORK CITY

INDEX TO VOLUME LXXV

January—June, 1920

GENERAL INDEX

Entries from the Digest of Current Electrical Literature are indicated by D (Digest)

PAGES BY WEEKS

Jan.	3	1 to	56
Jan.	10	57 to	112
Jan.	17	113 to	192
Jan.	24	193 to	248
Jan.	31	249 to	304
Feb.	7	305 to	360
Feb.	14	361 to	416
Feb.	21	417 to	472
Feb.	28	473 to	528
Mar.	6	529 to	584
Mar.	13	585 to	640
Mar.	20	641 to	710
Mar.	27	711 to	766
Apr.	3	767 to	822
Apr.	10	823 to	878
Apr.	17	879 to	934
Apr.	24	935 to	986
May	1	987 to	1038
May	8	1039 to	1118
May	15	1119 to	1174
May	22	1175 to	1230
May	29	1231 to	1294
June	5	1295 to	1350
June	12	1351 to	1406
June	19	1407 to	1462
June	26	1463 to	1518

A

Accident prevention:
——Barriers increase safety in electric station, *681.
——Carlessness of users the chief cause of electrical fires, 1447.
——Coal mines, electrical safeguards for Pennsylvania, 694.
——Fires, need of accurate records on causes of. By Charles T. McCutcheon, 1485.
——Grounding handle of air break switch. By T. N. Thomas, 681.
——Hazards of domestic electrical devices, 1209.
——Hazards of electric switches on washing machines. By F. A. Cambridge, 1197.
——Linemen's safety blanket, 705.
——Linemen, safety measures for protection of. By S. N. Clark, *681.
——New employees suffer most from accident,. By R. H. Wheelock, *1318.
——"No accident week" to help cause of safety in utilities, 1160.
——Protect workmen by inclosing switches. By A. Waldschmidt, *729.
——Rope used by linemen, need for testing. By F. A. Kentig, 1004.
——Safety guards for high-tension line workers. Bush Electric Co., *106.
——Safety switch block prevents motor starting, *26.
——Station accidents prevented by use of switch blocks. By Walter C. Wagner, *844.
Accounting:
——For utilities, to discuss uniform, 858.
——National uniform utility, virtually assured. 969.
——Uniform, final action referred to committee, 1022.
Advertising, commodity, electrical appliances to be featured in, 568.
Agriculture, electricity in (D), 336.
Air compressors:
——Compact, motor-driven. Brunner Mfg. Co., *523.
——Electropneumatic devices for electrically driven. By George J. Duckett Co., 172.
——Garage. United States Air Compressor Co., 816.
——Small and noiseless. Brunner Mfg. Co., *467.
——Tire inflater for garage use. Brunner Mfg. Co., 410.
——United States Air Compressor Co., 981.
Alternating-current:
——Machinery, analysis of performance by vector locus diagrams. By Leon Otis-Chevalier (D), 1160.
——Machinery, subdivided conductors for. By L. Fleischmann (D), 742.
——System, protection of. By Kenelm Edgcumbe (D), 798.
Alternators. (See under Generators.)
Aluminum:
——Casting alloys, some tests of light; the effect of heat treatment. By P. D. Mercia and C. P. Carr (D), 172.
——Effect of amalgamation upon the single potential of. By Louis Kahlenberg and John A. Montgomery (D), 88.
——In the electrical industry. By Frank Broadbent (D), 1436.
Amalgamation, effect of, upon single potentials of certain binary alloys. By Louis Kahlenberg and John A. Montgomery (D), 281.
American Association of Engineers:
——Condemns unionism in engineering profession, 1212.
——States position on proposed national federation, 1279.
American Institute of Consulting Engineers, Dr. Humphreys heads, *401.
American Institute of Electrical Engineers:
——Annual meetings, 1277.
——Berresford nominated for president of, *692.
——Convention:
——Entertainment program, 1441.
Convention, Decides against parallel sessions at, 1499.
White Sulphur Springs selected for, 507.
Tentative plans for, 970.
Tentative program for, 1213.
——Electrical household appliances, collecting data on, 508.
——Midwinter meeting, program for, 342; paper and discussions, *486.
——New vice-presidents, *1332.
——Pacific Coast sections to discuss transmission, 1019.
——Pittsburgh meeting, electric traction subjects discussed at, 693.
——Symposium on street illumination, 175.
American Society of Civil Engineers vote down federation plan for civic and welfare work, 967.
American Society of Mechanical Engineers, spring meeting topics; valuation and combustion, 1160.
American Washing Machine Mfrs.' Association meeting, 342.
Antenna. (See Radio.)
Arizona Gas, Electric Light and Power Association seeks relief in power shortage, 508.
Arizona utilities may make extensive improvements, 805.
Arkansas Utilities Association convention, program of, 806; managerial topics discussed, 1020.
Armature:
——Coil winder and shaper, Palmer Electric Co., 761.
——Conductors, current distribution in laminated. By F. Punga (D), 1381.
——Design recent progress in. By Wolff (D), 446.
——Dipping and baking plant, almost laboriess (D), 1015.
——Repair costs average $44.67 at Lehigh plant of Bethlehem Co., 1422.
Alloy for bonding aluminum to brass and copper. Mirete Co., 1032.
Associated Manufacturers of Electrical Supplies:
——Annual meeting, to hold, 619.
——Convention, heavy reservations for, 1442.
——Form standards committee, 563.
——See need for co-ordinated effort, *751.
——To meet in week of March 15, 453.
——To meet at New London in June, 1154.
Atomizer. Comfort Electric Atomizer Co., 1225.
Australia:
——Victoria, the electrical problem of (D), 1100.
Austria:
——Electrification of state railways, 1413.
Automobiles, electric starting systems for. By F. C. Barton (D), 1149.
Automotive equipment. Westinghouse Electric & Mfg. Co., 873.

B

Balancers. (See motor generators.)
Balancing of high-speed rotating machinery, dynamic. By H. Heymann (D), 172.
Balancing of turbines and propellers. By J. J. King-Salter (D), 1496.
Ballard, Russell H., *1038.
Batteries:
——Chargers:
Automatic panel. Cutler-Hammer Mfg. Co., 873.
Automatic unit section. Cutler-Hammer Mfg. Co., 929.
Hobart Brothers Co., *928.
Motor rectifier. Advance Electric Co., *1457.
Small. Westinghouse Electric & Mfg. Co., *411.
——Charging automobile batteries, rheostat for. Cutler-Hammer Mfg. Co., *1115.
——Connecting clip, lead-covered. Reliable Mfg. Co., *928.
Batteries (Cont.)
——Dry cell, magazine-type. Interstate Electric Novelty Co., 1115.
——Dry cells, hydrogen ion concentration in. By H. D. Holler and L. M. Ritchie (D), 855.
——Dry, multi-cell. Manhattan Electrical Supply Co., *298.
——Dry, unit. French Battery & Carbon Co., 1457.
——Electrolytic cell, resistance of. By Edgar Newbery (D), 618.
——New lead accumulator theory. By Ch. Féry (D), 88.
——Storage:
Automotive, standard for, 566.
Cadmium electrode for storage battery testing. By H. D. Holler and J. M. Braham (D), 336.
Cell tester. H. B. Shontz Co., 354.
Handle. Mueller Electric Co., 1400.
Nitrates and nitrites in battery acid, estimation of. By L. B. Sefton (D), 799.
Overcharging 100 per cent reduces life 15 per cent. By P. L. Rittenhouse, *788.
Separatorless. Electrolyte Storage Battery Co., 353, 929.
With improved terminal post. Campbell Electric Co., *187.
Beggs, John I. Again active in Milwaukee utility management, 1106.
Bell, Alexander Graham, *532.
Berresford, Arthur W., *1298.
Blasting machines, electric. Atlas Powder Co., *1400.
Blower, portable. Clements Mfg. Co., *872.
Boiler room:
——Ash dump, electric drive found satisfactory. By H. L. Rawson, *680.
——Ashes, cost of handling in small plant. By C. O. Sandstrom, 213.
——Atomizers, burning oil with mechanical. By Robert Sibley and C. A. Delany, *727.
——Boston Edison stoker and control equipment. By George R. Davison, *77.
——Charts show combinations of boilers and stokers to use for any load. By S. N. Clark, *1486.
——Coke breeze and anthracite screenings burned at 200 per cent rating. By I. E. Powell, 773.
——Dispatching method for operating boiler plant, *270.
——Distance of boiler from stack influenced amount of CO_2 in flue gas, *1094.
——Flue-gas test tank, one, used for three shifts. By Fred M. Richards, *1268.
——Handling ashes from twenty-two boilers by centrifugal pumps. By Aarvid Baalack, *1006.
——Indicator in, shows load on turbine, *1372.
——Meters in series show station load in. By T. N. Wynne, *325.
——Oil-burning apparatus in use at Providence, 91.
——Oil-burning equipment, comparative economy of, 659.
——Oil, economies obtained in burning. By Robert Sibley and C. H. Delany, 1483; comment, 1464.
——Oil filter, home-made, saves boiler tubes. By Aarvid Baalack, *1200.
——Oil firing costs $1,200 less per month for boilers rated at 1,000 hp. By H. A. Woodworth, 1094
——Plastic fire brick made in power plant, 6.
——Posting firemen's records makes better firing. By Fred M. Richards 1427.
——Preventing fuel losses due to faulty insulation, *22.
——Pulverized coal, cost of preparing, 647.
——Pulverized coal for steam generation. By H. G. Barnhurst, 1485.
——Pulverized coal, four-day test on five boilers burning (D), 798.
——Pulverized coal halves cost of banking boilers. By Paul W. Thompson, 1142.
——Pulverized coal in central stations. By John Anderson, *589.
——Station load, device to inform boiler-room attendants of. By A. L. Voncannon, 1316.
——Start boiler without flooding superheater. By Daniel G. Fisher, 1269
——Unit boiler plant, design of. By Louis R. Lee, *316.
Boilers:
——Blomquist steam generator (D), 87.
——Electrically heated, and heat storage (D), 1015.
——Keeping up steam in idle boilers takes over 0.02 gal. of oil per hp.-hr., 653.
——Ratings, proper interpretation of. By Louis R. Bell, 606.
——Stokers, mechanical performance of. By David Brownlie (D), 1382.
——Stokers, underfeed, middlewestern coal in, 495.

*Indicates illustrated articles.

Book reviews:
——Controllers for electric motors. By H. D. James, 911.
——Elementary principles of electricity and magnetism. By John E. Hoyt, 1439.
——Elements of electromagnetic theory of light. By Ludwik Silberstein, 911.
——Oil engines. By L. H. Morrison, 911.
——Radio engineering principles. By Henri Lauer and H. L. Brown, 1439.
——Steam turbines. By James Ambrose Moyer, 1439.
Boston:
——Edison Electric Illuminating Co. buys land for new super-power station, 401.
Bracket, one-piece brass. Peerless Light Co., *410.
Brass melting. (See under Furnaces, electric.)
Brazil: Electrification, American equipment for first South American main-line, 965.
British Guiana, possible development of hydro-electric power in. By Stafford X. Comber (D), 1275.
Britton, John A., *420.
Brooklyn Edison Company:
——Changes contract order routine, 500.
——Reports successful year, 401.
——Ten-year issues, 569.
——Trademark adopted, *558.
Brushes, standard carbon (D), 1436.
Bureau of Standards handicapped by lack of funds, 694.
Bureau of Standards may study inductive interference, 1333.
Busbar support, double. Delta-Star Electric Co., 1457.
Bushings, interchangeable, for high-voltage apparatus. By Eugene D. Eby (D), *392.
Byllesby & Co., H. M.:
——Customers took $3,387,100 preferred stock, 368.
——Look for prosperity in 1920, 34.

C

Cable box, interconnection. Auth Electrical Specialty Co., 1457.
Cables:
——Connector for quick work. General Electric Co., 467.
——Current densities in conductors and cables. By E. Soleri (D), 1014.
——High-tension, testing of, on constant potential. By M. Weiset (D), 1207.
——Lead-sheathed three-phase, capacity of. By R. Bouzon (D), *279.
——Paper-insulated lead-jacketed, data on, 78.
——Polyphase, fictitious capacities in. By Della Riccia (D), 280.
——Submarine, guiding of ships by means of. By R. H. Marriott (D), 1497.
——Submarine, location of breaks or faults in. By J. F. Lloyd (D), 88.
——Temperature, relative, of square and round conductors. By T. S. Taylor, *540.
——Underground, dielectric power loss and ionization voltage in. By F. M. Farmer (D), 503.
Caldwell, Edward thirty years of technical publishing celebrated, 1443.
Canada:
——All electrical interests co-operate in, 232.
——British Columbia electrical men meet, 1390.
——Hydro-Electric Power Commission, annual report of (D), 392.
——Jobbers up against supply shortage, 574.
——Manufacturers need more support from jobbers, 518.
——Montreal meeting, record, voices need for organization, *509.
——National Research Institute, plans for, 1416.
——Ontario Hydro commission embarrassed by power shortage, 344.
——Ontario Hydro-electric may have to increase power rates, 457.
——Ontario hydro-electric schemes, more than $17,000,000 to be spent on, 1281.
——Relation to the electrical industry, 923.
——Research institute proposed, 915.
——Water power resources of British Columbia (D), 392.
Canadian Electrical Association, Aylesworth to address, 1278.
——Active work planned at annual convention, 1503.
California co-operative campaign, 389, 1158.
Central stations. (See also Hydro-electric developments, Transmission systems.)
——Alabama Power Co.'s system. By J. M. Oliver, B. Nikiforoff and C. B. McManus (D), 743.
——California-Oregon Company properties, new company to acquire, 1333.
——Central Illinois Public Service Co., new lines for, 807.
——Central Maine hydro-electric merger and interconnection approved, 1159.
——Commonwealth Edison plant, ground broken for new 180,000-kw., 1327.
——Connecticut Light & Power Co., dam and hydro-electric plant of, *569.
——Connecticut Power Co., purchase of, by Hartford Co., 456.
——Consumers' Power Co., two 140,000-volt lines for, 806.
——Detroit Edison Co. makes big cut in expansion program, 1210.
——Eastern Connecticut Power Co. power station at Montville. By E. T. Phillips, *533; comment, 530.
——Generating capacity of large system, 164.
——Generating, substation and transmission-line equipment of companies operating at 44,000 volts and above. Chart supplement to May 8 issue. Explanation, 1075.
——Hartford Co. to buy Connecticut Power Co., 233.
——Havana utility to double plant capacity, 1388.
——Little damage to, in tornado, 801.
——Maine, important power merger planned in, 512.
Central stations (Cont.)
——Milwaukee Electric Railway & Light Co., Lakeside power plant, *626.
——Montana Power Co., interconnection, *1041.
——Niagara Falls Power Co., development, *661.
——Pacific coast, many projects contemplated for, 745.
——Pacific Gas & Electric to spend $123,000,000 in next eleven years, 1209.
——Pennsylvania power companies, large merger of, planned, 1214.
——Philadelphia Electric Co., huge induction regulator installation. By Raymond Bailey, *1355; comment, 1353.
——Puget Sound Power & Light Co., *1061.
——Sespe Light & Power Co. would serve power company in time of shortage, 625.
——Southern Power Company's largest station. By W. S. Lee and Richard Pfaehler, *1073.
——Taunton municipal plant may purchase energy, 1391.
——Thirty-year-old municipal plant at Danvers shut down, *1447.
——Toledo Company's new building, *233.
——Twenty-five-million-dollar station to be partly financed by consumers, 1017.
——Twenty-seven systems each had output of 400,000,000 kw.-hr. in 1919, 1098.
——Washington Water Power Co. service in agricultural districts, *1051.
Central station business and sales management:
——Advertising appropriations for central stations, 960.
——Advertising a washing-machine campaign, *907.
——Allowances to customers reduced 60 per cent, 613.
——Analysis of engineering employed in power sales. By A. G. Drury, 278.
——Attractive office an asset to utility, *1013.
——Bills, some advantages of using colored, 796.
——Buffalo General Electric Company, increase in lighting business, 740.
——Cafeteria in Louisville, data on electrically operated, *615.
——California, electrical co-operative campaign in, 389, 1158.
——Charge for fuse replacement coming into favor, 1378.
——Collecting the bill at the time of reading meters, 556.
——Competition in lighting develops business, 1012.
——Contract order routine, Brooklyn Company changes, 500.
——Cooking values of coal, gas, various fluid fuels and electricity, comparative, 1272.
——Costs of changing to alternating current. By E. J. Tracy, Jr., *388.
——Customers, central stations need quantity, 1147.
——Customers' orders, handling of. By Charles A. Collier, *740.
——Dayton Company, net earnings increased 37 per cent, 739.
——Delivering small appliances, charge made for, 556.
——Detroit Edison asks customers' help in power shortage, *1493.
——Differential, explaining the, 614.
——Diplomatic forecast of probable rate change, *85.
——Electric development of the West compared with other sections, 1273.
——Electric power cost versus cost of other commodities, *27.
——Electrical press service for Pacific Coast newspapers, 684.
——Emergency installation of motor shows savings over gas engine, *1492.
——Employees' commissions on appliance sales, 959.
——Energy costs to large consumers of power. By H. E. Thuerk, *443.
——Extension of rural-service lines gaining in South, 1019.
——Farm lines pay a profit, making. By H. H. Henley, 29.
——Follow-up letters, replacing collectors, 221.
——Furnace electric, and central-station rates, *1147.
——Furnaces, electric, continuous power supply necessary, 1013.
——Furnace, electric, load advantages. By Fred C. Hard, *500.
——Hartford, central-station business today and twenty years ago in, *684.
——Heating five-room apartment by electricity, cost of, 684.
——Heating load permits more watts per dollar than motors, 624.
——House heating by electricity in Tacoma, Wash., 1494.
——House-wiring campaign, nine-week, in New York City, *796.
——House-wiring survey in Chattanooga, form used to make, *501.
——Identification of employees protects customers, adequate, *1323.
——Illinois company, growth of, demands more facilities 795.
——Income, sources of central-station, 1146.
——Industrial heating display in Chicago. By A. F. Allsop, 1434.
——Inspection department proves to be a success, 220.
——Intercompany visits a success in New England, 1434.
——Kilowatt-hour, small consumer and. By C. S. Mann, 952.
——Lighting, cost of serving small customers with, 443.
——Merchandising costs, accurate method of showing, 1323.
——Merchandising departments, $106,264 profit from, 1433.
——Merchandising results in scattered Texas towns, 905.
Central station business and sales management (Cont.)
——Meter, allowing customer to read, 615.
——Meters, dependability of electric, 444.
——Mines, how load center of, changes, 685.
——Minnesota, handling rural business in state of, 222.
——Monthly message to customers, 277.
——Nebraska Company builds special line for farm service, 1434.
——New Orleans Company shows 70 per cent increase in customers, *614.
——Newspaper advertising used by Baltimore company in merchandising campaign, *1493.
——Ohio steel mills increase central-station load tenfold, 750.
——Politic way of introducing automatic rate adjustments, 85.
——Postal pillars represent steady load of 142 watts each, *613.
——Power-factor rate filed at Providence, 1492.
——Power supply in Columbus, Ohio, keeping up, *277.
——Power versus lighting rates for moving-picture machines. By "Kassandra," 1011.
——Profit making not always profiteering. By "Kassandra," 445.
——Profiting from the gasman's experience, 794.
——Prompt payment discount eliminated, 728.
——Providence Co., merchandising business 23 per cent over last year, 1380.
——Public policy in bills to consumers of energy, *222.
——Range advertisement, effective, used by Maine Co., *84.
——Range business, possibilities of electric, 1378.
——Range customers satisfied, how to keep, four thousand, 333.
——Range load, small town electric, 1012.
——Ranges, important points in selling, 850.
——Ranges, records in handling troubles with ranges, *221.
——Range sales, central-station assistance in financing, 905.
——Rate differences explaining, 502.
——Rate for household service, optional flat. By J. F. Farquhar, 556.
——Rate-making, retail, for energy bought at wholesale. By Earle D. Jackson, 332.
——Rates, departure from, justified, 501.
——Refrigerator, domestic, earns most per kilowatt demand, 907.
——Refrigerators as numerous as pianos, electric, 28.
——Refrigerators, electric, revenue producers, 84.
——Refrigerators, motor-driven, give Detroit no trouble, 276.
——Refrigerator, revenue and load furnished by home electric, *851.
——Reliable power spells industrial salvation, *1433.
——Revenue from non-ferrous electric furnaces more than from induction motors, 1272.
——Revenue from washing machines and irons inter-relation of, 794.
——Rural lines, features of agreement to build, 1146.
——Rural service, cost of furnishing, 851.
——Sales of all appliances except irons increase, 613.
——Steam heating should be profitable for power companies, 1336.
——Steam laundries, studying power costs for. By P. P. Pine, *905.
——Value of prompt-payment discounts questioned, 85.
——Water heating, what; means in central-station revenue, 959.
——Winter revenue from curbside outlets, *389.
——Wisconsin conference on agricultural service. By C. D. Le Cheverell, 83.
Central station management:
——Baltimore Company modifies plan for retiring employees, 852.
——Baltimore Company requires certificates of inspection for connecting new wiring, 1435.
——Bonus plan for store salesmen, benefits from, 1146.
——Brockton utility shares prosperity with customers by reducing rates, 1215.
——Combating water shortage and cost of oil in southern California, 1147.
——Cost of money to a Massachusetts central station, 1205.
——Customer stockholders, plan to interest, in company affairs, 443.
——Electric arc furnace and central station, 1379.
——Employee representation in Illiois utility, 1493.
——Employees' beneficial association a factor in good service, 1205.
——Employees, central station gives, free insurance, 38.
——Employees' health, safeguarding, 739.
——Employees, utility, arrange for special instruction, 331.
——Expenditure of $1,750,000 would save $800,000 annually, 1019.
——Farm-line service has become a social necessity. By Alfred Alsaker, 1371.
——Farm service lines, higher transmission voltage for, 331.
——Insurance on rural lines, *1322.
——Junk dealer, why patronize 741, comment, 711.
——"Learn the truth" advertising aids New Orleans Company, *1435.
——Merchandising costs, central station, *961.
——Narragansett Company, good fellowship club of, *960.
——Pennsylvania property sells $558,600 stock to customers and employees, *1273.

*Indicates illustrated articles.

361375

Central station management (Cont.)
——Pensions for employees of Ontario Hydro-Electric Commission, 1433.
——Porch lighting to prevent robberies in city of Denver, 1148.
——Public utility's gross revenue, how spent, *1204.
——Securities, merchandising methods used to sell, 500.
——Securities of utility maintained at par, 850.
——"Straight Salaries" advised for power solicitors, 1322.
——Study courses conducted by employees of Southern California Co. By M. McNeal, 1205.
——Successful local financing of small companies, 1378.
——Supplies, normal, reserve of, not improper hoarding. By "Kassandra," 852.
——Traveling library in construction camp, *1012.
——Utica company maintains contractor-dealer window display. By W. J. Reagan *794.
——Utility establishes free market for its stock, 277.
——Utility offers six engineering courses to college men, 1378.
——Western company caused wide distribution of stock among customers, 1011.
——Wholesale rate making for energy to be sold at retail. By "Kassandra," 795.

Central station operation. (See also Boiler Room.)
——Air-break switch, grounding handle of, to prevent accidents. By T. N. Thomas, 681.
——Arc-lamp troubles stopped by eliminating ground return. By C. F. Nagle, 1198.
——Arkansas, developing electrical possibilities in, *1265, comment, 1233.
——Armored cable carries circuits around caved-in line, 1318.
——Automatic ship hoist conveys coal to bunkers, 271.
——Barriers increase safety in electric station, *681.
——Battery floating voltage should be 2.12 to 2.14 per cell, 680.
——Branding poles to check depth of setting. By L. J. Moore, 1373.
——Bearing clearance measured with lead fuse wire. By Thomas Hall, 1006.
——Bonus system increased number of meters read by 50 per cent, 1488.
——Cable-pulling device made from a Ford car. By William Hemphill, *272.
——Cable splices in soft ground, protecting. By F. D. Weber, *551.
——Cables from transformers to substation run above ground, *552.
——Calibrated service fuses employed as meter shunts for test. By Willard S. Wilder, 1428.
——Central power stations efficient operation of. By J. D. Morgan (D), 171.
——Central station operating ratio decreasing, *260.
——Chart gives energy in pond for different elevations. By Norman H. Davidson, *1199.
——Communication between power stations. By A. Lancagne (D), 1149.
——Commutation improvement increases exciter capacity, 215.
——Connecting ground wire to pipe, 1197.
——Construction crew foreman, some pointers for. By L. W. Wyss, 680.
——Cooling towers, fish keep water fresh in. By L. J. Moore, 1006.
——Co-operation in operating department brings big fuel saving, 512.
——Cost of 33,000-volt line and substation, itemized, 1005.
——Cost of 2,500-kw. extension of New England central station, 1429.
——Device for cutting threads on shaft in place. By H. G. Hynds, *1317.
——Device that automatically closes oil switch after tripping out. By J. H. Stockbridge, *953.
——Diesel engines, installation costs of. By S. N. Clark, 1095.
——Disconnecting switches operated mechanically, *166.
——Disconnecting switches, testing. By C. S. Lloyd 552.
——Dispatching loads of several plants on same river. By E. J. Crawford, *1141.
——Distribution auditor saves transformer purchases, 609.
——Economy falls 11 per cent when vacuum drops two inches. By Thomas Hall, *845.
——Electric current in water acts as screen to prevent passing of fish. By John H. Longfellow, 1427.
——Electrical apparatus, present status of, *1261, comment, 1232.
——Emergency-circuit lamps, precaution taken to avoid outage of, 735.
——Employment of oil as fuel for central stations, 83.
——Engine speed, effect of, on generator operation, 382.
——Entrance of moisture to cable prevented by tap. By D. D. Clarke, *439.
——Exciter, separate, desirable for each steam-driven generator, 955.
——Exciter voltage, low, causes control trouble. By L. W. Wyss *383.
——Feeding two-phase plant with single-phase transformers. By H. H. Stephens, *1428.
——Four 7.5-kva. transformers substituted for two of 15-kva. rating. By James F. Meister. *1317.

Central station operation (Cont.)
——Frequency charger set, emergency operation of. By H. W. Eales, 326.
——Fuel 52 per cent and labor 18 per cent of operating expenses, 788.
——Generator breakdown, moisture is cause of. By Mark Meredith, 437.
——Generator insulation, drying, after shipment, 608.
——Generator, troubles caused by shaft currents in. By James Dixon, *1487.
——Generators, arrangement for paralleling dissimilar direct-current. By James Dixon, 734.
——Graphic operating records show daily plant performance, *901.
——Graphic record of outages on transmission systems. By O. B. Reemelin, *1316.
——Grounding practices of central stations, 166.
——High-power telephone for system dispatching. By R. C. Denny, *437.
——Home-made bus barriers prevent short circuits, *214.
——Home-made fiber strain insulators withstand heavy load. By Fred E. Therrein, *1317.
——Home-made light derrick raises eighteen poles in half day. By E. G. Robinson, *1427.
——Hydraulic valve operated quickly by motor. By R. K. Durland, *1374.
——Hydro-electric plant costs, analysis of. By G. R. Kenny, 954.
——Induction regulator, home-made gives zero to 160 volts, 552.
——Instrument transformer ratio charged automatically with test voltage. By L. B. Johnson, *1268.
——Insulating mats, value of linoleum for, 1488.
——Insulating stand, light-weight wooden. By Harry Restofski, *272.
——Insulation, recording status of, *383.
——Insulator life less the greater the span. By O. C. Traver, 1200.
——Insulators, tested alive at cost of 2.13 cents each, more than 123,000, 954.
——Insufficient insulation cause pole-top burns. By R. H. Halpenny, 77.
——Interconnected steam and hydroelectric plants make for economy, 1322.
——Interpole strength adjusted on job. By James Dixon, 607.
——Isolated plants compared with central stations, 170.
——Jet condenser, turbine and motor drive, 327.
——Joint-pole lines, tentative specifications for, *789.
——Lamp filaments near high-voltage conductors broken by vibration. By A. E. George. *609.
——Lamp inspection, adjustable tower for, *494.
——Lamp short, effect of, on switch operation. By L. W. Wyss, *326.
——Lamps operated below rating, breakage offsets saving on, 733.
——Life of rectifier tubes used with series arc lamps. By F. B. Lewis, 216.
——Lifting tool for high-tension lines, simple. By H. E. Weightman, *77.
——Limitation to output removed by modifying rheostats. By N. B. Higgins, 79.
——Line construction, factors essential to good, 1142.
——Line failures at railroad crossings, preventing, *382.
——Load on several lines, economical division of. By Lansing W. Thoms, *777, comment, 768.
——Load regulated by headgate when governor control fails 790.
——Locating ground on distribution system, *21.
——Locating grounds with portable transformer. By Frank Gillooly, *215.
——Maximum-demand outfit installed without interrupting service, *789.
——Megger successful for testing insulation and locating cable grounds, 900.
——Melting sleet from high-tension lines. By N. B. Higgins, *216.
——Mercury-arc tubes, maintaining proper temperature for. By R. W. Kidd, *495.
——Meter department in scattered territory, operation of, 268.
——Meter filings in, avoided by magnetizing after assembly. By Victor H. Todd, *844.
——Meter installation, compact, *607.
——Meters, 100-page book provides records of 2,000, for five years. By James F. Meister, *954.
——Meters, stenciling numbers on round. By P. M. Cordell *496.
——Motor-generator set inverted, difficulties in operating, 382.
——New Bedford Edison plant, enlargement of, 1318.
——New stack holds tackle for dismantling old stacks. By Jack Abbott, *1429.
——Oil and glove testing on large distribution system. By Douglas Borden, *607.
——Oil in 30,000-barrel tanks, gage to measure, *1374.
——Oil-switch tanks, failure averted by inspecting interior of, 494.
——Overload trouble traced to loose millivolt connections. By L. W. Wyss, 1094.
——Parallel operation of unsimilar direct-current generators. By B. N. Emmet, *1373.
——Periodic inspection saves company $6,000 per year, 735.
——Permanent station buses for grounding and testing. By Walter C. Wagner, *1141.
——Pipe vises hold current transformers on test, *165.

Central station operation (Cont.)
——Placing new machine in service, precautions for, 496.
——Power factor chart used with two watt meters to determine. By Russell G. Warner, *1095.
——Power-factor correction, inexpensive method of. By Carl Fichtel, *550.
——Power-plant switches, hints on operating. By L. W. Wyss, 272.
——Pulverized fuel bins trouble caused by sweating of, 846.
——Relation between line regulation load and size of conductor. By A. M. McCabe, *1199.
——Relay has accurate timing mechanism, home-made. By J. E. Armstrong, *1198.
——Relays, compact kit for testing a wide range of. By A. E. Brownlee, *733.
——Remote control for small water power, home-made. By Frank D. Elwell, *1005.
——Resistance of switches and fuses averages 0.025 ohm. By H. E. Weightman, 1316.
——Rising cost of electrical service, the, 169.
——Rotating light synchroscope easily seen at distance. By J. O. Bangsburg, *1373.
——Safety measures for protection of linemen, By S. N. Clark, *681.
——Sags tabulation of, for stringing conductors 327.
——Series incandescent switchboard home-made, *216.
——Service quickly resumed after substation fire. By H. W. Wallau, 384.
——Short circuit currents in networks. By W. R. Woodward, *715, comment 713.
——Spring prevents arrestor from remaining on charge, *214.
——Standardized switchboards aid in substation enlargements, how. By D. D. Clarke, *955.
——Static discharges and ground detector made with small stock transformers. By Charles E. Harger, *900.
——Steel-mill load, preparing to carry a, *480, comment, 475.
——Steam turbine, how to test emergency trip of. By Thomas Hall, 608.
——Street-lamp inspection, one-pole ladder facilitates. By C. W. Geiger, *437.
——Street-light fixture making dustproof, 846.
——Street light troubles caused by bugs. By C. E. Shepherd, 1007.
——Submerged turbine bearings lubricated from main floor. By N. B. Higgins, 21.
——Supplying light and power in an emergency *1142.
——Supports for vertical and horizontal cables, *78.
——Switch, special, for several sets of service mains, *270.
——Switches, remote-control, rules for operating, 384.
——Synchronous condenser operated without an attendant. By C. C. Stock, 1200.
——Tapping live high-tension lines, safe method of. By R. L. Dodd, *609.
——Test rod to indicate "live" cable, simple, *165.
——Test to check deterioration of lubricating oils. By C. D. Basler, 1374.
——Timer holds voltage constant when testing meters accurate, *1007.
——Tool for stripping lead cable sheath. By H. E. Weightman, *1372.
——Transformers overheating cutting extra oil ducts stops. By George Bailey, 1372.
——Transformer quickly cleaned by gasoline circulated through oil filter. By A. N. Lofstrand, 899.
——Transmission and distribution losses, data on 494.
——Transmission company, some of the practices of a. By A. W. Cartwright 271.
——Transmission line telephone, additional ground wire improves. By F. C. Arthur, 1487.
——Transmission network, losses in 33,000-volt, 735.
——Turbine trouble, high pressure on extra gage indicates. By Thomas Hall, 1140.
——Two cables installed for generator leads. By F. B. Lewis, 166.
——Underground records of central station prove valuable, *901.
——Vacuum of 30.35 in. reached in New York, 344.
——Ventilation for station generators, artificial. By N. B. Higgins, *165.
——Warm air counteracts dampness of transformer room, 550.
——Wire rheostat submerged in water for testing large generators. By James Dixon, *846.
——X-Ray transformers require liberal service rating. By Montford Morrison, 550.

Chamber of Commerce:
——Again favors private ownership, 1106.
——International Chamber of Commerce announced, 862.
——Meeting, 805, 857.
——Public works department, taking vote on, 1159.
——Public works referendum fails to carry, 1389.
——To hold referendum on labor relations, 1385.

Chicago:
——Codes changes, clearing house on, 396.
——Credit men vote to change name, 514.
——Electric Club opens permanent home, *752.
——Street-lighting program, fifteen million dollar, 399.

——Utility interest should exceed 6 per cent, says Massachusetts governor, 1281.
——Water-power developments, financing. By Hugh L. Cooper, *645; comment, 643.
——Western Electric issues $25,000,000 five-year bonds, 859.
Fire prevention (see Accident prevention)
Fixtures, incandescent lamp:
——Bathroom, white-glass. Luminous Unit Co., 980.
——Combined ceiling and reading light. Majestic Heater Co., *929.
——Dust-proof. Cassidy Co., *816.
——Dust-proof. Philip Panama Electric Light Co., 1401.
——Extension light. Wood-Craft Co., *1456.
Fixtures, incandescent lamp (Cont.)
——High-power lamp commercial fixture. F. W. Wakefield Brass Co., *188.
——Indirect, vacuum cleaner to remove dust from, *1480.
——Industrial lighting, diffusing. Central Electric Co., *298.
——Industrial unit. Luminous Unit Co., *523.
——Panama Lamp & Commercial Co., 981.
——Portable light, waterproof. Charles Cory & Son, 1457.
——Rug display. Pittsburgh Reflector & Illuminating Co., *299.
——Shade holder for plug clusters. Benjamin Electric Mfg. Co., 1032.
——Suspension hanger. F. W. Wakefield Brass Co., 981.
——Totally inclosing, for commercial lighting. Ivanhoe-Regent Works of General Electric Co., *1400.
——Transparency frame, electrically lighted. National Retailers' Advertising Corp., 410.
——Two-piece unit. Sunlight Electric Co., 1225.
——Ventilation, fallacies in. By J. R. Cravath, 898.
——With appliance receptacle. Luminous Unit Co. of St. Louis Brass Mfg. Co., 761.
——With clip. Diamond Electric Specialties Corp., 1401.
Flash lamps:
——Autogenerative, an (D), 279.
——United States Electric Mfg. Corp., 354.
Flatirons, electric:
——Tailors', with inclosed-coil type element. Simplex Electric Heating Co., 1345.
——Two-point, electric. Central Flatiron Mfg. Co., *816.
Floor surfacer. G. M. Watters Mfg. Works, 1169.
Foreign trade. (See also Trade conditions.)
——British court rules against gas-filled lamp patents, 1111.
——Canadian Manufacturers need more support from jobbers, 518.
——Convention theme, effect of being creditor nation is, 1107.
——Council is to hold convention, 41.
——Cut in promotion estimates serious, 507.
——Czecho-Solvakia, ten-year expansion program in, 1451.
——Department of Commerce, appropriation for work of, is not cut, 563.
——Dutch lamp manufacturer licensed by G. E. to make lamps in Canada, 519.
——Electrical exports for April amount to *6,954,350, 1509.
——Electrical exports for February, improvement shown in, 924.
——Electrical exports, high record set for, in 1919, 849.
——Electrical exports, October 1919, 44.
——English lamp interests, report on combination of, ill advised, 975.
——European market for American electrical goods, 924.
——Export trade continues to fall off, 631.
——Few manufacturers allot for foreign business, 1340.
——Foreign exchange rates affecting electrical exports, 237.
——Foreign-made electrical supplies on view, samples of, *176.

——Lamp renewal and theft in mines are reduced. By F. C. Stanford, *168.
——Lamps, device for rapid testing of, *497.
——Lamps, 115-volt, on 230-volt circuits in industrial plants. By D. W. Blakeslee, 1491.
——Lamps, large, in series with portable lamps saves fuses. By C. H. Griffith, *1009.
——Large-capacity portable stand for holding armatures. By W. A. Harris, *610.
——Lighting fixtures, mirror for inspecting inside of indirect. By J. L. Stair, *682.
——Liquid rheostats for temporary installations. By Ralph McKinney, *498.
——Loose motor shaft causes insulation to chafe. By L. A. Francis, 611.
——Maintenance methods, large industrial plant. By I. H. Gaskin, 385.
——Measurement of curve areas facilitated by overdamping instruments, *612.
——Measuring energy without tapping line, 26.
——Meter panel, standard saves difficulties in pumping installation, *792.
——Monorail hoist saves time in loading trucks. By Ernest Burchard, *1431.
——Motor air gaps, gaging and adjusting. By H. L. Hayes, 1430.
——Motor card record which is useful in transfers. By I. H. Gaskin, *328.
——Motor-driven lathe stopped automatically, *442.
——Motor for irregular loads, calculating proper size of. By D. W. Blakeslee, 791.
——Motor installation for temporary drive not bolted to floor, *385.
——Motor starters, home-made emergency. By James Dixon, *1008.
——Motor-starting torque determined by weighing turning effort, *499.
——Motor-starting trouble illustrates necessity for checking connections. By Arthur R. McDonald, *903.
——Motors and control mounted on large milling machine. By W. B. Atchinson, *1145.
——Motors in steel mills, spare parts required for, 1431.
——Motors mounted on combined wood and iron beams, *499.
——Motors, mounting, on back-geared machines. By S. Howard, *330.
——Motors thrown on line for starting in regrinding mills, 1096.
——Mounting on boring machine adjustable for different motors. By W. B. Atchinson, *1203.
——Mounting starters on round column, *1430.

Industrial applications (Cont.)
——Oil switch mounted on side of shallow cell, *1376.
——Outdoor substation for railroad interlock system. By E. W. Kolb, *612.
——Outlet boxes setting, in concrete columns. By T. F. Dickman, *553.
——Oven, varnish-baking, has easy circulation and temperature control. By F. de Muth, *847.
——Parallel operation of transformers, conditions for successful. By James Dixon, *1376.
——Penthouse above machine shop used as substation, *1010.
——Pilot lamp indicates state of plant circuits. By Clayton J. De Merritt, *80.
——Portable testing table for industrial plant. By I. H. Gaskin, *738.
——Power requirements of machines in bindery. By R. E. Peters, 440.
——Power survey, portable testing outfit used in. By R. F. McNutt, *24.
——Preventable breakage of lamps almost 20 per cent. By D. W. Blakeslee, 1320.
——Remote control of machine tool, home-made floor stand for. By Walter B. Atchinson, *738.
——Remote control of transformers aids the watchman, *555.
——Residual magnetism causes relay armature to stick. By J. H. Robertson, 737.
——Resistance of insulation, voltmeter method of testing, *330.
——Reversed connections cause fan motor to heat. By Fred Soller, 1430.
——Reversed series field caused fan to blow fuses. By Fred Soller, 1271.
——Riveting machine, motor mounting designed for, *219.
——Rotary converter made from 15-hp. direct-current motor. By C. W. Goding 793.
——Rotary converter used for intermittent lathe duty. By Theodore C. Katsigris, 167.
——Rotor, simple method for balancing a high-speed. By James Dixon, 848.
——Rubber plants, electrical equipment used in Ohio. By H. C. Stephens, *956.
——Safety-switch block prevents motor starting, *26.
——Screw device for forcing armature on shaft. By James Dixon, *903.
——Series motors mechanically connected, unstable operation of. By Taylor S. Burke, *1490.
——Service is sectionalized at stairway landings, 274.
——Side outlets fastened in concrete forms with wire or screw. By Lyman L. Afton, *442.
——Side wall mounting for motor and compressor. By Walter B. Atchinson, *902.
——Signal lamp to call machinist in composing room. By L. E. Heftner, *737.
——Single-sheave haulage gives reliable service. By F. C. Stanford, *1377.
——Shovel, large electric, saves time of two men. By P. S. Stevens, *1143.
——Spring coil and stop prevent switch damage, *167.
——Starting switches, mounting four, on one column, *1491.
——Storage-battery haulage by railroads, data on, 167.
——Switch mounting, solving a difficult problem in, *387.
——Switch mounting a 3,500-amp., in limited space, *1271.
——Switch on circular saw operated by knee, *847.
——Synchronous motor, adjusting excitation of, for power-factor correction. By James Dixon, *1096.
——Synchronous motor saves $30,000 a year in refrigerating plant, *737.
——Tapping power lines causes voltage to ground. By C. A. Aubrey, *554.
——Test lamps inclosed in portable boxes to prevent breakage. By L. E. Wood, *848.
——Test results tabulated on factory motor card. By R. F. McNutt, *81.
——Test voltages obtained with compensators, *329.
——Testing for alternating current, methods used in. By Joseph Braff, 217.

Insulators:
——Testing, for resistance to thermal changes, 1479; comment, 1465.
——Testing grounded circuits, convenient device for. By Henry Restofski, *555.
——Transformer mounting in factory testing department, *791.
——Transformer, special, prevents lights flickering on direct-current circuit *848.
——Transformers converted for outdoor use to save construction, *1321.
——Two methods of attaching crane trolley feeders. By H. L. Cornelison, *1321.
——Two-phase motor reconnected for three-phase operation. By Charles A. Aubrey, *1096, correction, 149.
——Unbalanced rotor, apparatus for correcting. By L. E. Wood, 497.
——Utilization of available equipment saves mine from shutdown. By L. Hundley, 498.
——Valves, methods of operating by motor. By Mark Meredith, 1097.
——Varnishes to use for electrical work, 1432.
——Water heater, home-made electric. By Eustace C. Soares, *1201.
——Watt-hour meter daily, necessity for reading, 274.

Instruments:
——Cases, Hickok Electrical Instrument Co., 1401.

Instruments (Cont.)
——Color testing, electric arc. Atlas Electric Device Co., *107.
——Corona voltmeter and electric strength of air. By J. B. Whitehead and T. Isshiki (D), 1437.
——Electrical indicating, standardization of. By G. Y. Allen (D), 505.
——Electrometer sensitivity. By E. Schreiber (D), 743.
——Galvanometer, new form of vibration. By P. G. Agnew (D), 1497.
——Graphic, value of, industrially is emphasized, 510.
——Magneto fault finder. Stahl Rectifier Co., *981.
——Miniature electrical measuring. Westinghouse Electric & Mfg. Co., *106.
——Motor-operated switchboard and portable graphic. Westinghouse Electric & Mfg. Co., *1290.
——Recording. Bristol Co., 354.
——Sine wave-testing sets. By E. J. Burnham (D), 962.
——Single-pivot measuring. Herman H. Sticht & Co., *105.

Insulation, electric:
——Coil wrappers, thermal conductivity of. By T. S. Taylor, *369, comment, 363.
——Desirable properties in, 904.
——High-voltage, researches in. By Harris J. Ryan, *255.
——Molded, composition. By R. T. Fleming (D), 1275.
——Porcelain. Evansdale Clay Products Co., 816.
——Story of insulations. By C. E. Skinner (D), 1383.
——Tests on a new insulating material (D), 281.
——Thermal conductivity of insulating material. By T. S. Taylor (D), 561.
——Thermal expansion of insulating material. By Wilmer H. Souder and Peter Hidnert (D) 393.
——Vacuum and heat treatment of insulating materials. By J. E. Shrader (D), 1383.

Insulators:
——Varnished rotton and silk cloth for insulation purposes, manufacture of (D), 1497.
——Electrical stress on, at strain towers. By W. D. A. Peaslee, *843.
——Line, present and future of. By F. W. Peck, Jr., *209.
——Link-type, connector for. R. Thomas & Sons, *705.
——Porcelain:
High-tension. By W. D. A. Peaslee (D), 1436.
Fuchsine method for testing porosity of electrical. By W. D. A. Peaslee, 1420.
——Practice, analysis of insulator, I, 543, II, *597, III, *673, comment, 530.
——Thermal conductivity of solid. By W. M. Thornton (D), 744.
Insull Martin J., *1234.
Ionization and resonance potentials for electrons in vapors of lead and calcium. By F. L. Mohler, Paul D. Foote and H. F. Stimson (D), 1150.

International Electrotechnical Commission:
——Indorses U. S. temperature-limit scheme, 917.
——International standards, report of progress on, 1282.
——Meeting in Belgium, 745.
——Report on meeting by Institute delegates, *287.
Inventions, public to have benefit of government, 807.
Iron alloys, the influence of chemical composition and thermal treatment upon magnetic properties, specific resistivity and density of. By E. Gumlich and P. Goerens (D), 393.
Iron and Steel Electrical Engineers, grounded neutral favored at meeting of Pittsburgh, 968.
Ironing machine with gas-heated shoe. Barnett Foundry & Machine Co., *928.

Italy:
——Electric traction in. By L. von Verebely (D), 504.
——Hydroelectric stations in the south of. (D) 171.
——Inductive interference problems, American engineers to help solve Italian, 1388.

J

Jobbers' 1919 Sales $300,000,000, 158.

——Textile mill will require 5,100 half-horsepower, 1505.
——Washing-machine, standardizing, 1333.
——Water-air radiators for cooling generators and. By H. G. Reist and E. H. Freiburghouse (D.), *908.

N

National Association of Electrical Contractors and Dealers:
——Convention in October, entertainment details of, 1281.
——Traveling representative for, 622.
National Electric Credit Association to convene June 17, 1396.
National Electric Light Association:
——Apparatus committee decides on tendencies, 232.
——Commercial section, meeting of, 94.
——Convention:
Big spectacle to be staged last night of, 1021.
Committee, John B. Miller, chairman of, 178.
Delegates to pick oranges, *458.
Entertainment program, elaborate, 965.
"High lights" on, 689.
Illumination of gardens at Hotel Huntington, *1313.
In a nutshell, 1103.
Program, 748, 1105.
Proceedings and reports, *1179, comment, 1176.
Reports, *1235, comment, 1231.
Special, blue, departure advanced one day, 1105.
Special, red, thirty day trip planned for, 507
Specials, big demand for, 857.
State commissioners to address, for first time, 801.
——Engineering department, W. J. Canada to head, 967.
——Executive committee, manufacturers on, 1327.
——Geographic section office, pioneer, *1336.
——Great Lakes Section tentatively approved, 804.
National Electric Light Association (Cont.)
——Iowa section convention, rural business to be discussed at, 1444.
——Members, adds more than 2,000, during year, 861.
——Merchandising and lighting schedules, 94.
——New departments, heads for, appointed, *567.
——New England convention spot, *805.
——New England section president on co-operation with contractors, 1390.
——Overhead systems committee, progress of, 94.
——Pacific coast section program, 747, convention, 1188.
——President Ballard, on his way back East, 178, in New York, 283, to tour south, 337.
——Public policy committee, manufacturers appointed on, 339.
——Reorganization program. By M. H. Aylesworth, *1089.
——Rocky Mountain geographic section proposed, 451.
——South enthusiastic over plans of, *455.
——The responsibility upon the. By R. H. Ballard, *124.
——To departmentalize headquarters activities, 344.
——Wiring committee tests of portable cords for heaters, 232.
National Electrical Code:
——Changes under consideration, 748.
——High-potential systems, rules on. By G. S. Lawler (D), 224.
——Proposed changes, public hearing on, 398.
——Radio signalling proposed revision on, 622.
——Revision to, 804.
National Electrical Safety Code:
——Grounding and station rules, further changes in, 1387.
——Proposed changes on signal lines, pole strength and joint poles, 1280.
——Requirements, new, 397.
National Research Council elects officers, 1447.
New England, planning for power in, *557.
New England, question-box conference brings together, 807.
New York Edison's gross earnings increase $3,464,069, 1443.
New York resources, investigation of, being made, 858.
New Zealand, line construction in (D), 504.
Nitrogen, atmospheric, fixation by silent electric discharge process. By C. F. Harding and K. B. McEachron (D), 1497.
Nitrogen, electrical energy in fixation of. By Eric A. Lof, *148.
Nitrogen fixation by the electric arc, theoretical study of. By C. P. Steinmetz (D), 963.
Nitrogen plant, work started on initial unit of large, 1389.
Nitrogen products committee, report of (D), 618.
North American Co., Mortimer resigns from, 802.
North Carolina farms, engineering service on, 1475.
North Central Electric Association finds use of lignite coal imperative, 1441.
Norway:
——Alternators rated at 22,000 kva. for Glomfjord. By J. Wennerberg (D), 686.
——Water-power development appropriations in
——Chester Station, *231.

O

Oil:
——And powdered fuel for central stations. By C. H. Delaney, *128.
——As fuel discussed in Philadelphia meeting, 40.
——As fuel, from producer's viewpoint. By Henry Thomas (D), 1101; 1437
——California Railroad Commission investigates price of, 862.
——Shortage, fear of, limits adoption of that fuel, 400.
Oil circuit-breakers:
——Development important. By B. G. Jamieson, 135.
——Recent developments in. By J. W. Upp (D), 504.
Oil tester, portable. General Electric Co., *816.
Organizing Conference of technical societies to be largely attended, 1213.
Oscillations, line fed by undamped. By L. Lombardi (D), 963.
Outlets, manufacturers urged to show devices connected to, 492.
"Own Your Home" campaign, electrical interests active in, 862.

P

Panelboards standardizing. By Fred B. Adam, 1093.
Pasadena authorized to buy local Edison system for $533,262, 1444.
Patent office employees, higher salaries for, 625.
Philadelphia Electric Co.:
——Chester Station: *231.
——Growth of business, 513.
——Sells notes, 231.
Phonograph, Electric, with suspended motor. Louis S. Kurtzmann, 107.
Photoelectric spectrophotometry by the null method. By K. S. Gibson (D), 281.
Photometer:
——For routine testing, sphere. By K. Schmidt (D), 1325.
Piezo emfs., quantitative investigation of, *1358.
Physics, the new. By A. C. Crehore (D), 32.
Pipes and piping:
——Fittings, interchangeable threadless. Erie Electrical Equipment Co., *411, correction, 635.
Plating, bronze. By F. C. Mathers and Stanley Sowder (D), 855.
Plowing machines, electric. By Ach. Delamarre (D) 1275.
Plugs and receptacles:
——Current tap. Bryant Electric Co., *1290.
——Duplex receptacle with hinged doors. Bryant Electric Co., *873.
——Plugs:
Connector. Magnus Electric Co., 1169.
Heater connector. Magnus Electric Co., 1401.
Two-way, with pull chain. Benjamin Electric & Mfg. Co., *1032.
——Receptacles:
Four-pole. Delta-Star Electric Co., *1401.
——Rosettes, Crescent Electric Co., 354.
——Sockets:
Candle. Peerless Light Co., 1345.
Candle-length. Cutler-Hammer Mfg. Co., 873.
Crescent Electric Co., 354.
Lamp dimmer. Anylite Electric Co., 354.
Light controller. Anylite Electric Co., 411.
Poles. (See also Distribution and Transmission.)
——Cedar, natural life of. By Page Golsan, *257, comment, 250.
——Extension, fabricated. S. W. Hull & Co., 354.
——Extension top, steel. S. W. Hull & Co., *761.
Potentiometer:
——Amplifier connections. By Blondel and Touly (D), 799.
——For measurements on telephone circuits a new alternating-current. By P. O. Pedersen (D), 88.
——Precision portable. Brown Instrument Co., *578.
Power consumption in group drive of self-acting machines (D), 335.
Power development, reported plans under way for nation-wide, 858.
Power factor:
——Correction. By M. Nott (D), 1150.
——Customer's average, determining. By B. H. Freeland, 209.
——In electric supply systems, improvement of (D), 504.
——Measurement of, for rates. By C. E. Brown, *721.
——Preventing versus correcting poor. By H. Goodwin, Jr. (D), 447.
Power, industrial (D), 686.
Power plants:
——Bungalow type, *626.
——Chile, the Tocopilla power plant in (D), 1324.
——Control and signaling circuits in power station, importance of. By Probst (D), 1496.
——Economizer, savings clue to. By R. G. Bohn (D), 1100.
——Flooded power station, putting back into commission. By C. L. Kasson (D), *335.
——Foundations, power house. By E. M. Lurie (D), 742.
——Lansing, Mich., million and a half dollar municipal plant, 568.
——Maintenance in, standard. By A. B. Stitzer, I, *718; II *887, comment, 712.
——Power for copper refineries, 262.
——Prime mover practice, raising economy in, *1257, comment, 1232.
——Relay protection for large power stations. By O. C. Traver (D), 335.
——Short circuits on power-house equipment. By E. G. Merrick (D), *798.
——Station auxiliaries, electric drive for. By E. E. George, *1365; comment, 1353.
——Steam, data and results of test, 439.
——Steel-plant power generation from waste heat and coal. By B. H. Greene (D), 1014.
——Utility buys war plant at 40 per cent of cost of material, 567.
Power resources in Arizona. By Paul C. Coke, 787.
Power shortage on hydro system, *510.
Power supply:
——Of central Massachusetts, centralization and conservation of. By F. L. Hunt (D), 391.
——Textile mills, development of. By W. Browning (D), 854.
——Textile mills, Southern. By J. E. Sirrine (D), 854.
Power systems:
——Electrical layout of large. By Robert Treat (D), 335.
——Of North Central states. By Chester H. Jones (D), 281.
Precipitation of material from smoke and gases, electrical equipment used in (D), 392.
Price, F. S., points way toward co-operation, 289.
Protective combination for farm service. Schweitzer & Conrad, Inc., 106.
Public relations:
——Appliance inspection gets business and good will, *276.
——Avoiding overcharge complaints by educating the public, 1148.
——Better, theme of Wisconsin convention, 747.
——Brockton utility shares prosperity with customers by reducing rates, 1215.
——Case where public suffers more than utility, 1011.
——Duty of industry to participate in public works, says Arthur Williams, 1156.
——Facts customers should know, *331.
——Farm paper fostering public utility service to farmers, 1272.

*Indicates illustrated articles.

Public relations (Cont.)
——Good will, effect of attractive retail store on public. *388.
——Goodwill for the industry, building. *739.
——Goodwill, how picture post cards promote in San Joaquin valley. 390.
——Illinois newspapers according fair treatment to public utilities. 1442.
——In 1920, forecast of. By Samuel Ferguson. 120.
——Light bills used to promote goodwill. By J. Lightbody. *850.
——Marks of courtesy that build good will. *907.
——Of public utilities. 558.
——Promoting acquaintance of municipal and utility officials. 1273.
——Public does not understand, says Aylesworth. 1156.
——Self-interest appeal gained new stockholders. *959.
——Southern public utility, favorable publicity for. *685.
——Utility information bureau plan spreading rapidly. 564.
——Utility publicity bureaus, cost of running. 625.
Public service corporations:
——Appraisal and valuation methods, outlined, public utility. 1332.
——Boston utilities co-operate with city in fire protection. 1158.
——Cities Service going forward with plans for increased capacity. 965.
——Easier to contract for power than to finance development. 919.
——Government ownership of water powers and utilities, Gompers for. 750.
——Municipal ownership, governor of Indiana condemns 961.
——New Jersey utilities to pay record tax levies 1105.
——Outlook encouraging, Stone & Webster declare. 860.
——Pennsylvania charters, large number of companies seek. 860.
——Philadelphia utility, head of, champions aggressive policy. 591.
——Power companies of Minnesota and the Dakotas organize. 967.
——Public utilities have passed peak of crisis, says J. G. White. 967.
——Public utilities of Indiana organize. 256.
——Socialization of public utilities opposed in Massachusetts. 696.
——Utilities ask for 12 per cent return plus 4 per cent reserve. 1103.
——Utilities of Illinois urge valuation at present-day costs. 862.
——War caused temporary growth in casualties of public utilities, 1391.
Public works department, referendum to business men on proposed. 913.
Public service regulation. (See Regulation of public utilities.)
Pumps and pumping:
——Deep-well, motor-driven. Burnett-Larsh Mfg. Co., 299.
——Electrical pumps in copper mines, energy consumption of. 435.
——Fire pump. Lea-Courtney Co. 354.
——High vacuum. Newark Engineering & Tool Co. 1225.
——In California, performance of electric. By Charles H. Lee (D), 743.
——Oil, portable. Fulflo Pump Co., *353.
——Oil-well pumping, applying motors to. By W. G. Taylor. *17, comment, 2.
Pyrometer, multiple recording. Brown Instrument Co., *635.

R

Radiation data, computing and intercomparing. By W. W. Coblentz (D), 618.
Radio:
——Aircraft naval. By T. Johnson, Jr. (D), 1383.
——Ammeter. Roller-Smith Co., *873.
——Amplifier and detection, two-stage. International Radio Telegraph Co., *523.
——Amplifier, two-stage. Clapp-Eastham Co., *635.
——Amplifiers. By Marius Latour (D), 1015.
——Amplifying coil. Clapp-Eastham Co., *523.
——Annapolis station (D), 744.
——Antennae, artificial. By K. W. Wagner (D), 744.
——Antenna constants, formulas for calculating. By August Hund, 898.
——Antenna radiation field, absolute measurements of magnetic field strength in an. By Rausch von Traubenberg (D), 1437.
——Atmospheric interference, progress against, reported. 860.
——Audion as detector, theory of. By F. Carbenay (D), 561.
——Audion oscillator. By R. A. Heising (D), 1101.
——Audion vacuum tube detector. International Radio Telegraph Co., *1290.
——Chile, long-distance communication in. By E. W. Fielding (D), 963.
——Clock error, recording of Eifel Tower time signals for determination of. By L. B. Turner (D), 687.
——Coil antenna and open antenna for receiving, comparison between. By Max Abraham (D) 687.
——Condenser, square-law. International Radio Telegraph Co., *1345.
——Condenser, variable. Connecticut Telephone & Electric Co., 1457.
——Co-operation of American, organizations, 93.
——Deionization of electric arc vapor, determination of rate of. By Henry G. Cordes (D), 225.
Radio (Cont.)
——Dependence of amplification constant and internal plate circuit resistance of three-electrode vacuum tube upon structural dimensions. By J. M. Miller (D), 1015.
——Direct commercial wireless with England established. 565.
——Direction-finding apparatus. By A. S. Blatterman (D), 336.
——Disturbances, Marconi investigating origin of. *1160.
——Ferro-magnetic phenomena at high-frequencies, old and new theories regarding. By H. Fassbender (D), 744.
——Fessenden "pelorus" (wireless compass). By Reginald A. Fessenden (D), 448.
——German army, portable apparatus used by. By A. Salomon (D), 909.
——Goniometric functions applicable to directive aerials. By A. Blondel (D), 32.
——High-speed messages graphically recorded by means of amplifiers for very low frequency. By Abraham & Bloch (D), *1325.
——Impulse excitation, experiment on. By John H. Morecroft (D), 799.
——Inter-imperial communication through cable wireless and air. By Charles Bright (D), 88.
——International regulations engineers working on, 970.
——Largest station in the world, plan, 1209.
——Legislation, problems of, to be outlined. 508.
——Linear variable condensers for wireless work. International Radio Telegraph Co., *1225.
——Motor-generator, 500-volt. International Radio Telegraph Co., *467.
——Oscillator, constant-frequency. General Radio Co., *705.
——Progress in the art of communication. By Bancroft Gheradi and Frank B. Jewett, *202.
——Radiotelegraphy:
Austrian portable sets for wireless telegraphy. By Eugen Nesper (D), 505.
Direction finding by. By Riall Sankey (D), 281.
Distress calling device, new Marconi (D), 799.
German aircraft. By E. Niemann (D), 687.
Light-weight portable set. Wireless Specialty Co., *816.
Portable wireless set. Winn Radio & Electric Mfg. Co., *1169.
Poulsen arc converters design of. By Leonard F. Fuller (D), 281.
Poulsen system of. By G. Pession (D), 1275.
Radiation of antenna systems. By Max Abraham (D), 560.
Receiver circuits, theory of radiotelegraphic and radio-telephonic. By J. F. J. Bethenod (D), 393.
Rome, station at. By B. Micchiardi. G. Pession and G. Vallauri (D), 1207.
Use of three-electrode vacuum tubes for radio telegraphy and telephony. By C. Gutton (D), 32.
——Radiotelephony:
By E. H. Colpitts (D), 281.
By N. H. Slaughter (D), 561.
Multiplex, possible, 399.
New York to Chicago, with low-power sets, 344.
Receiver circuits, theory of radiotelegraphic and radio-telephonic. By J. F. J. Bethenod (D), 393.
Use of three-electrode vacuum tubes for radio telegraphy and telephony. By C. Gutton (D), 32.
Versus wired telephony for power systems. By Nuebel (D), 1381.
——Reception of weak signals at shore wave lengths, new method for. By Edwin H. Armstrong (D) 1015.
——Regulation of, by Department of Commerce favored. 565.
——Rheostat. Clapp-Eastham Co., *467.
——Stations of the United States (D), 281.
——Stations taken over by government to be returned to owners. 451.
——Transformer for experimental use. International Radio Telegraph Co., 411.
——Transmission and reception with antenna and coil aërials, principles of. By J. H. Dellinger (D), 336.
——Transmitter, special type of quenched-spark. By D. Galen McCaa (D), 225.
——Transmitters, high-power vacuum-tube (D), 561.
——Triode valves, internal action of. By W. H. Eccles (D), 393.
——Use of, by transmission companies. By G. A. Iler, *377.
——Vacuum-tube amplifiers. By W. Schottky (D), 448.
——Vacuum tube detector and amplifier. International Radio Telegraph Co., 816.
——Variation in direction of propagation of long electro-magnetic waves. By A. Hoyt Taylor (D), 281. (D) 505.
Railroad administration diverts coal cars for power plants. 339.
Railways:
——Austria state, electrification of. 1413.
——Automatic control for Boston surface cars. By A. D. Webster (D), 280.
——Automatic substation, applying the. By C. A. Butcher (D), 1014.
——Axle-generator regenerating system. By R. E. Ferris (D), *559.
——Berlin Rapid Transit, cog-wheel drive. By E. C. Zehme (D), 854.
Railways (Cont.)
——Chicago electrification not to start for two or three years, 694.
——Chicago, Milwaukee & St. Paul Railroad, electric power supply for. By A. W. Copley (D), 560.
——C., M. & St. P., first train over newly electrified Pacific Coast section of, *695.
——Chicago, Milwaukee & St. Paul, new coast electrification opened. 619.
——Chicago, Milwaukee & St. Paul, power indicating and limiting apparatus. By B. H. Smith (D), 617.
——Cost under pre-war conditions and today, relationship of items of. By F. W. Doolittle (D), 224.
——Current losses from direct-current railway track circuits. By Girousse (D), 1436.
——Denver & Rio Grande electrification plans revived, 917.
——Direct-current, calculation of ground currents due to (D), 616.
——Direct current, calculation of track pressure drop and losses on. By F. F. P. Bisacre (D), 798.
——Direct-current, summary of high-voltage. By W. D. Rearce (D), 1496.
——Direct-current traction, studies in. By F. Guery (D), 1496.
——Electric traction, future of. By Roger T. Smith (D), *504.
——Electric traction subject of Pittsburgh A. I. E. E. meeting. 564, 693.
——Electrification in super-power zone. By W. B. Potter (D), 1325.
——Electrification of steam. By M. Semenza (D), 1101.
——Energy for car purposes, economical use of. By D. D. Ewing (D), 1014.
——High-speed electric locomotives, type "Baltic" (D), 1324.
——Italy electric traction in. By L. von Verebely (D), 504.
——Locomotive, 3,000-volt direct-current passenger. By W. D. Bearce (D), 504.
——Locomotives, electric, for industrial purposes. By Kenneth Andrew and Walter Fixter (D), 447.
——Locomotives for Bernina Railroad, electric freight (D), 1206.
——Locomotives, remotely controlled electric. By H. H. Johnston (D), 743.
——Low-speed and high-speed interurban freight locomotives, comparison of. By D. C. Hershberger (D), 31.
——Pennsylvania Railroad's electric locomotives. By M. F. Clement, 606.
——Pittsburgh Street, butt-welded joints installed on lines of (D), 962.
——Rail-bond terminal, American Mine Door Co., *1169.
——Rail joints and bonds, construction and maintenance. By E. R. Shepard (D), 1101 (D), 1207.
——Railway motors, overloads in. By F. W. McCloskey (D), 280.
——Railway motors, preventing breakage of armature leads on. By A. L. Bromall (D), 31.
——Reciprocating steam engine, last stand of. By A. H. Armstrong (D), 854.
——Regenerative braking in alternating-current traction. By L. Monath (D), 854.
——Safety car, the. By N. H. Callard, Jr. (D), 280.
——St. Paul Rocky Mountain division, new passenger locomotives for (D), 392.
——Silesia, electric traction in. By E. C. Zehme (D), 560.
——South African, electrification of the (D), 280.
——South American main-line electrification, American equipment for first, 965.
——Steam railroad electrification the spirit of the times *127.
——Substation, automatic operation, experience shows economy of, 650.
——Substations, automatic. By Frank W. Peters (D), 962.
——Switzerland, electrification in. By K. Sachs (D), 504.
——Turin-lirie-Lanzo railway, electrification of (D), 798.
Ranges, electric. (See Stoves, electric.)
Rates:
——Asks 60 per cent increase, gets 10 per cent. 1444.
——Capitalization of free franchise not allowed in rate case. 564.
——Cleveland, made by Ohio commission for, 285.
——Departure from, justified. 501.
——Differences, explaining rate. 502.
——Farm electric service, increased in Ohio, 557.
——Federal Reserve Bank director shows fallacy of low utility rates, 1334.
——Flat, defended in Cape Cod hearings, 27.
——Flat, for Ontario Hydro-electric energy finds advocates, 1212.
——For irrigation installations, disadvantages of flat, 613.
——Higher, defended by Maryland commission, 861.
——Higher, natural result of coal miners' wage increase, 801.
——Idaho Power Company, increase granted to, 1327.
——Increased cost of money recognized in higher rates allowed utility, 1442.
——Lighting company allowed temporary rate relief in record time, 971.
——Missouri flexible-rate system recommended, 1387.
——Of Seattle municipal system may be increased, 1441.
——Public loses by inadequate return, says president of A. I. E. E., 861.

*Indicates illustrated articles.

Rates (Cont.)
——Regulation, tendencies in. By L. R. Nash, 431.
——Rural, debated by Wisconsin Electrical Association, 803.
Rectifier:
——Electric current (D), 686.
——Glass-bulb mercury-arc, in theory and practice. By Fritz Kleeberg (D), 1382.
——Mercury arc, for large outputs, *1364.
——Mercury arc, working of. By E. Carlevaro (D), 908.
——Motor, for battery charging. Advance Electric Co., *1457.
——Of alternating-current, new low-power lamp. By John Scott-Taggart (D), 1495.
Regulation of public utilities. (See also Rates.)
——Accelerated commission processes, McCarter calls for, 806.
——Accrued depreciation not allowed where rates were inadequate, 919.
——Additional rate to absorb higher costs. Harry A. Wheeler suggests, 1153.
——California commission to act in drought situation, 623.
——California output, state power administrator now controls, 914.
——Commission must allow utilities to earn more, says M. R. Bump, 971.
——Commission viewpoint on rising costs 1322.
——Eight per cent return insufficient, declares George N. Tidd, 750.
——Georgia utility executive declares commission regulation to be one-sided, 1336.
——Government control of monopoly. By "Observer," 1139.
——Governor and commission at odds in New Jersey, 95.
——Illinois commission asks cities to appoint utility commissioners, 1017.

——Direct-driven machines, electrical inspection report for. By R. E. Peters, *386.
——Incomplete repairs cause second failure. By Mark Meredith, 499.
——Motor repairs, piece work reduces cost of, 375.
——Obtaining various test voltages, method of. By E. E. George, *217.
——One rheostat used for two generator fields. By C. W. Goding, *25.
——Records that facilitate replacements and repairs, *275.
——Rewinding 220-volt induction motor for 110 volts. By C. A. Johnson, *736.
——Stator holder convenient, for motor-winding shop, *274.
Repair methods (Cont.)
——Switchboard useful for motor repair shop. By C. W. Goding, *1377.
——Test boards for repair shop, easily made. By C. A. Johnson, *1010.
——Tightening commutators on large motors. By J. S. Dean, *1009.
——Tools and methods for correctly soldering commutator tails. By R. L. McIntyre, *958.
——Tools, home-made, for electrical repair shop, *385.
——Transformer for locating motor troubles, home-made. By C. A. Johnson, *1202.
——Undercutting tools made from file and hacksaw blades, *902.
Research, scientific and industrial:
——Canada, plans for National Research Institute 1416.
——Canadian institute of, proposed, 915.
——Department conducted by Prof. Vladimir Karapetoff.
Investigations in progress or completed, 449, 688, 910, 1151, 1438; Suggestions for research, 450, 688, 1151, 1438.
——Dr. Whitney's inspiring viewpoint on. By Elmer A. Sperry, 493.
——Electrolysis survey and experiment, methods of, 449.
——Government research on utility problems, Dr. Rosa suggests, 1388.
——National Research Council elects officers, 1447.
——Needs strong support. By Vladimir Karapetoff, 603.
——Scientific research in the engineering schools. By Dr. A. E. Kennelly, *150.
——Tariff on. By Louis Bell, 952.
——What is needed to develop good research workers. By W. R. Whitney, *151.
Resistance and inductance of conductors, integration methods of deriving a.c. By Harvey L. Curtis (D), 1497.
Resistance of ground, new method of measuring. By Shiro Sano (D), 393.
Resistance unit. Wirt Co., 981.
Rice, Richard H. Optimistic view of turbine development, 893.
Roentgen rays:
——Coronaless aerial system. Engeln Electric Co., 354.
——Radiography, present-day. By G. W. C. Kaye (D), *617.
——X-Ray outfit, portable. General Electric Co., *981.

S

Safety. (See Accident prevention.)
Sander, motor-driven hand. American Floor Surfacing Machine Co., 411.
Sanding, portable machine for flat. Universal Machine Products Co., *872.
San Francisco, completely equipped electrical home opened in, 1445.
Saw, portable jig. Clapp-Eastham Co., *1514.
Searchlights:
——Carbon arcs for. By C. G. Patterson, J. W. T. Walsh, A. K. Taylor and W. Barnett (D), *446.
——In United States navy. By Ralph Kelly (D), 223.
——Military searchlamps of large caliber. By M. Grosjean (D), 279.
——Photometric measurements on. By Gehlhoff (D), 334.
——Photometry of (D), 86.
——Searchlamp in the war, high-power electric. By Marius Grosjean (D), 391.
——Sperry Gyroscope Co., 354.
——War history of, New York illuminating engineers hear, 916.
Self-interest:
——A key to utility financing. By A. Emory Wishon, *997; comment 987.
——Plan of California being told in the East, 915
——That gained new stockholders, *959.
——Wishon to tell self-interest story in the East, 859.
Sewage, electrical treatment of, by the Landreth process (D) 393.
Shades, for individual lamp bulbs, linen. J. A. Whaley & Co., 107.
Ships:
——Battleship, fourth electric, launched, 695.
——Diesel electric equipment for yacht "Elfay," 546; *782
——Electrical propelling machinery for U. S. S. Tennessee. By Wilfred Sykes (D), 560.
——Guiding, by means of submarine cables. By R. H. Marriott (D), 1497.
——Propulsion, electric, of merchant. By W. R. Emmet (D), 448.
——Shipping board to develop electric drive, 915.
Signal Corps:
——Organization approved by house, 697.
——War work based on American practice, 35.
——Work of, during months of war, *92.
Signalling systems:
——Audible electric signals in industrial plants and acoustical engineering. By V. Karapetoff (D), 560.
——Bank protection system. Stanley & Patterson, 1457.
——Battery bell. Electric Signal Mfg. Co., *1290.
——Buzzer. Electric Signal Mfg. Co., 1457.
——Double-horn factory signal. Benjamin Electric Mfg. Co. *761.
——Electric. By Wolf (D), 963.
——Electric light for train signals on Swiss railroads. By G. Schlosser (D), 336.
Signalling systems (Cont.)
——Railroad crossing signal, electrically operated. Charles Adler Electric Brake Co., 299.
Sign, electric script-letter. Indestructible Sign Co., 1456.
Signs, insulated danger. C. B. Hughes, 299.
Silesia:
——Electric traction in. By E. C. Zehme (D), 560.
Snows, winter, lacking in high Sierras, *283.
Socialism, the old and the new. By Frank W. Chase, 787.
Societies. (Listed alphabetically.)
Society for Electrical Development:
——Big companies resume membership in, 455.
——High special service record, 1104.
——Membership drive, 802.
——Pacific Coast interests to co-operate with, 1444.
——Scope of work told by Freeman, 969.
Sockets. (See Plugs and receptacles.)
Solenoids:
——Coils are made from stampings, *262
South Africa, celebrating peace electrically in, *95.
Southern California Edison Co.:
——Water shortage brings increase of $1,750,000 in fuel cost, 624.
Southwestern Electrical and Gas Association holds most successful convention, 1279.
Spain:
——Hydro-electric power systems, equipment of (D), 447.
——National power distribution project. By F. Chapelain (D), 1274.
Spark gap, rotary. Klitzen Radio Mfg. Co., 1225.
Sperry, Elmer Ambrose, *990.
Sprague, Frank Julian, *882.
Stair-routing machine. American Router & Mfg. Co., 1457.
Standardization of working voltages of electrical plants in Germany (D), 224.
Standards, to discuss proposed international electrical, 566.
Statistics:
——Central-station energy output and revenue, October, 1919, *10; November, 1919, *322; December, 1919, *547; January, 1920, *785; February, 1920, *1,000; March, 1920, *1313.
——Domestic electric service among people of foreign countries, *484; comment, 474.
——Electric service in the American home, *1133; comment, 1119
——On 1919 production of electrical equipment and supplies, 160.
Steam pressures, what the adoption of higher will mean. By F. R. Parsons (D), 447.
Steinmetz, Charles Proteus, *476.
Steinmetz develops truck with regenerative braking, 341.
Steel castings, electric, characteristics of, 63.
Steel-mill auxiliaries, electric control of. By C. Howard (D), 225.
Steel mill, large, has 118,000 hp. in connected load, 457.
Stoker Manufacturers' Association:
——To continue work begun during war, 1281.
——To meet at Lakewood, N. J., 1156.
Stokers. (See Boilers.)
Stone & Webster:
——New members of firm now in, 91.
——To push sale of utility securities locally, 692.
Stoves, electric:
——Compact electric ranges. Simplex Electric Heating Co., *873.
——Ranges, effect of on distribution layouts. By H. P. Seelye, 595; comment, 587.
——Table. Bestov Mfg. Co., 981.
——Table. Redtop Electric Co., 1457.
Street lighting. (See Lighting, street.)
Substations: (See also Central stations.)
——At Flushing, features of new. By W. C. Blackwood, *433.
——At Nashua, N. H., concrete industrial, *139.
——Automatic, eliminate labor expense. By R. J. Wensley, 137.
——Bus compartments, economical construction for, *373; comment, 363.
——Distribution, new features in. By Walter H. Millan, *883; comment, 880.
——Equipment of central-station companies operating at 44,000 volts and above. Chart supplement to May 8 issue. Explanation, 1075.
——High-voltage outdoor, show saving in cost, 752.
——Outdoor, built at low first cost, *438.
——Outdoor, simple design, *790.
——Standardized layout for outdoor, *21.
——Short-circuits, limiting. By R. F. Gooding, I, *771; II, *949; comment, 937.
——Terraced, built in difficult location, *1269.
Super-power:
——Development, urgent need of. By Lieut.-Col. C. F. Lacombe, *1128; comment, 1120.
——Railway electrification in the super-power zone. By W. B. Potter (D), 1325.
——System hearings, Atlantic seaboard, 689.
——Zone, objection to Government development of, 1153.
——Zones urged by mining engineers' committee, 968.
Surges on a system of parallel conductors. By H. M. Pleizel (D), 31.
Sweden:
——Vasteras, the peak steam plant in (D), 1437.
Switchboard:
——Ammeter shunts, Westinghouse Electric & Mfg. Co., *1345.
——For plant of moderate size, selecting a. By G. E. Wendle (D), 446.
——For radio work, portable. Krantz Works of Westinghouse Electric & Mfg. Co., 92c.

*Indicates illustrated articles.

Switchboard (Cont.)
——Meter connections for alternating-current circuits, II. By J. C. Group (D), 743.
Switch-box support, metal, E. & B. Mfg. Co., *188.
Switches. (See also Circuit breakers, Control, and Oil circuit-breakers.)
——Air-brake, 90,000-volt, with separable insulator units. Delta-Star Electric Co., *1224.
——Disconnecting forces acting on. By L. B. W. Jolley, 381.
——Duplex call switch for hospitals. Cutler-Hammer Mfg. Co., 353.
——Entrance, safety. Lewis Electric Co., 1115.
——Entrance, two-pole and three-pole. Ward Electric Co., *299.
——Oil, for star-delta control. Electrical Machinery Sales Co., *467.
——Oil-immersed, operated by clapper type magnet. Cutler-Hammer Mfg. Co., *50.
——Outdoor, large, and transformers. By S. F. Hayes and W. A. Coates (D), 855.
——Pull. Luminous Unit Div., St. Louis Brass Co., 354.
——Quick-make-and-break, weatherproof. V. V. Fittings Co., *299.
——Quick-make and quick-break safety. V. V. Fittings Co., *243.
——Starter, inclosed, for small direct-current motors. Cutler-Hammer Mfg. Co., *635.
——Starting, inclosed. Frank Adam Electric Co., 1115.
——Switchgear, British, safety features of. By B. E. G. Mittel. *309; comment, 307.
——Switchgear, high-power. By Max Vogelsang (D), 1014.
——Switchgear, specification of alternating-current. By A. E. Van Davies (D), 909.
——Toggle, heavy-duty. Harvey Hubbell, Inc., ***1290.**
——Tumbler, foot-operated. General Electric Co., 523
——Two-pole double-throw snap. General Electric Co., 410.
——Wall-type pull. General Electric Co., 705.
——With quick make-and-break attachment. Trumbull Electric Mfg. Co., *49.
Switzerland:
——Interconnecting high-tension bus (D), 503.
——Railway electrification in. By K. Sachs (D), 504.
Synchronous converter:
——B. G. Lamme tells St. Louis engineers of, 285.
——Technical story of the. By B. G. Lamme (D), 503.
Synchronous, machines:
——Di-polar diagrams of. By André Blondel (D), 334.
——Effect of line resistances upon short-circuit phenomena in. By Biermanns (D), 744.
——Mechanical features of. By A. P. Wood (D), 797.
——Oscillating frequency of two dissimilar. By R. E. Doherty (D), 797.
——Starting conditions of. By Alfred Hay and F. N. Mowdawalla (D), 503.

T

Telegraphy:
——Automatic printing telegraph. Kleinschmidt Electric Co., *1514.
——Localization of high-resistance breaks in submarine cables. By A. Poulsen (D), 1015.
——Multiplex telephony and telegraphy. By K. W. Wagner (D), *336.
——Rapid telegraphy. By Montoriol (D), 32.
——Progress in the art of communication. By Bancroft Gherardi and Frank B. Jewett, *202.
——Propagation of telegraphic impulses on loaded lines. By R. Holm (D), 32.
——Tension of wires, finding, without tension ratchets (D), 744.
Telephony:
——Aircraft. By Capt. B. S. Cohen (D), 281.
——Amplifiers, duplex. By Marius Latour (D), 1383.
——Automatic exchange systems, some comparisons of (D), 687.
——Automatic switching, applicability of, to all classes of telephone service. By Arthur Bessey Smith (D), 225.
——Automatic telephone for New York City, 803.
——Automatic telephone in New England, *178.
——Bare wire may supersede insulated communication cables, 1020.
——Cable terminal. Reliable Electric Co., 354.
——Census report on the telephone systems, 177.
——For naval service, new, *1391.
——High-power telephone for system dispatching. By R. C. Denny, *437.
——High power telephone transmitter, new (D), 32.
——Interference, experiences in correcting telephone. By Howard S. Phelps, 833.
——Multiplex telephony and telegraphy. By K. G. Wagner (D), *336.
——Progress in the art of communication. By Bancroft Gherardi and Frank B. Jewett, *202.
——Protecting telephone lines against disturbances from power transmission lines, Latour system. By A. Costabel (D), 1207.
——Radio versus wired telephony for power systems. By Nuebel (D), 1381.
——Receiver as a mechanical-electrical transformer. By Hahnemann and Hecht (D), 744.
——Receivers, testing of. By Pirani and Paschen (D), 744.
——Telephone repeaters. By Bancroft Gherardi and Frank B. Jewett (D), *88.
Telephones (Cont.)
——Tension of wires, finding, without tension ratchets (D), 744.
——Transmission of superimposed circuits, telephonic. By Kazukigo Ogana (D), 448.
Tension device for coil-winding. Belden Mfg. Co., 299, 1400.
Testing of high-tension cables on constant potential. By M. Weiset (D), 1207.
Theft of electrical energy in Missouri, campaign against, 511.
Thermocouple potentials. By I. Melville Stein, *1371.
Thermo-electric force of some alloys. By M. A. Hunter and J. W. Bacon (D), 855.
Thermostatic metal. By Henry Herrman (D), 418.
Thomson, Elihu, *770.
Toaster, automatic. Strite Automatic Toaster Co., *635.
Tools:
——Bag for linemen, collapsible canvas tool. Industrial Products Co., 929.
——Linemen, collapsible canvas bag for. Industrial Products Co., 761.
——Tree trimmer has two speeds. Bush Electric Co., 299.
Towers. (See Transmission systems.)
Townley, Calvert, *1354.
Traction. (See Railways.)
Tractors. (See Vehicles, electric.)
Trailer used by Detroit Company in transporting 2,000 kw. transformer, *79.
Transformers. (See also Substations.)
——Auto-, for phase-changing service. General Electric Co., *1400.
——Coils, finding polarity of. By Paul Girault (D), 1149.
——Connections, characteristics of some polyphase transformer. By L. F. Blume and A. Boyajian (D), 743.
——Connectors which eliminate mistakes. By M. M. Samuels, *895.
——Cooling methods. By G. E. Armstrong, *541; comment, 531.
——Current for testing of cables. By Frank Gilooly, *23.
——Emergency connection for cotton mill transformer, *23.
——For electric furnaces. By J. L. Thompson (D), *617.
——For rural lines, possibilities of standard. By S. N. Clark, 76.
——Furnace transformer busbars, interlacing. By C. B. Gibson, *991; comment, 988.
——Giant (D), 30.
——High-current (D), 853.
——Instrument:
Field testing of. By H. M. Crothers, 732.
Mounted in old transformer case. By L. H. Rawson, *733.
Testing of, III. By H. M. Crothers, *319; comment, 307, IV. By F. A. Kartak, *1368.
——Iron-sickness in transformers and generators. By M. Vidmar (D), 86.
——Line, primary cutout for. By G. A. Armstrong, 1315.
——Losses in. By Reginald C. Kapp (D), 742.
——Possibilities of standard, for rural lines. By S. N. Clark, 76.
——Power, some recent development in. By W. S. Moody (D), *334.
——Scott-connected, operation of. By Requistan and Loutzky (D), 1381.
——Sign. Betts & Betts Corp., *1224.
——Softening cooling water for. By Gale S. Strunt, 1315.
——Switches, large outdoor, and. By S. F. Hayes and W. A. Coates (D), 855.
——Tertiary windings in. By J. F. Peters (D), *334.
——Testing, by the alternating-current potentiometer. By Douglas C. Gall (D), 448.
——Testing laboratory at Purdue, for 600,000-volt, *863.
——Windings, cooling of, after shut-down. By V. M. Montsinger (D), 559.
Transmission systems and overhead construction.
——Abnormal voltages, protecting from. By C. E. Bennett, *365; comment, 362.
——Aluminum transmission conductors, experience with, 781.
——Arcing rods shorten time of outages on transmission line. By Henry H. Hunt, *845.
——California, Map of, 1070.
——Contactors for tapping lines. By Ach. Delamarre (D), 1149.
——Cost of constructing transmission lines, data on, 548.
——Dead-ends on towers changed to suspension on live 110-kw. line, *1140.
——Discontinuities in overhead transmissions (D), 280.
——Eastern seaboard, Map of, 1079.
——Economic voltage of long transmission lines. By Henry H. Plumb (D), 1436.
——Electric extra-pressure and systems of protection. By L. Lombardi (D), 854.
——Electrical characteristics of transmission circuits. By William Nesbit (D), 335; (D), 392; (D), 742, (D), *1274, (D), 1381.
——Ground wire on transmission lines. By W A. Hillebrand, 436.
——Harmonics, third, in three-phase systems. By D. I. Cone, *780; comment, 769.
——High-tension direct-current transmission. By "Kassandra."
——High-voltage By Thomas Commerford Martin 1267.
——High-voltage, limitations of. By T. A. Worcester (D), 447.
——High-voltage power-transmission problems. By W. W. Lewis (D), 503.
——Interference, co-operation of telephone and transmission engineers lessens, 566.
Transmission systems and overhead construction (Cont.)
——Interconnection:
Central Maine hydro-electric merger and interconnection approved, 1159.
In Eastern Pennsylvania, further.
In Kentucky and West Virginia coal fields, 398.
In Middle West, interchange of energy, *1087.
In New England, *1077.
In New England, generating capacity of 500,000 kw. interconnected, *865.
Interconnected steam and hydro-electric plants make for economy, 1322.
Montana what, has done for, *1041.
New England, benefits of, 502.
New England, Map, 1076.
Of industrial power plants, 1389.
Pennsylvania-New Jersey power system, 250,000 kw. to be interconnected in, 1017.
Pennsylvania, Ohio and West Virginia, predicted, 1018.
Problems involved in interconnecting systems. By H. A. Barre, *136.
Proving its worth, 451.
Southern water-sheds, linking three, *1081.
Springfield-Turners Falls, *343.
State-wide, in California by May 1, 913.
Swiss interconnecting high-tension bus (D), 503.
Use, to fight local regulation in Illinois, 858.
——Lines serving railroads, ownership of. By N. A. Kemmish, 1426.
——Losses in transmission lines, determining. By Oscar Gaarden, *536.
——Maps of. (See geographical sections.)
——Middlewest, of the. Maps, 1085, 1087.
——New England Power Co. By G. A. Dillard and H. R. Wilson (D), *686.
—Northwest, of the, Map, 1056.
——Occurrence of over-voltage at points of discontinuity on transmission lines. By Grabscheid (D), 797.
——Pole-top construction used by mining company, *539.
——Poles of reinforced concrete, transmission line. By M. Foerster (D), 30.
——Poles, single wood, for use for 100,000-volt line. By L. J. Moore, *953.
——Pòwer transmission and industrial development. By Ross J. McClelland (D), *31.
——Power transmission, larger aspects of, comment, 1039.
——Protective resistances for high-tension apparatus. By H. Gewecke (D), 560.
——Protective signs on high-tension lines. By G. Dettmar (D), 393.
——Saga sag, calculation of. By P. O. Szilas (D), 742.
——Seattle-Spokane transmission line (D), 223.
——South, of the, Map, 1082.
——Span, a 5,000 ft., *1215.
——Synchronous effect of two parallel transmission lines, 438.
——Telephone interference, experiences in correcting. By Howard S. Phelps, 833.
——Three-phase lines, approximate ratings of, *1138.
——Transformer practice on rural transmission lines. By Roy L. Dodd, 900.
——Transmission-line equipment of central-station companies operating at 44,000 volts and above. Chart supplement to May 8 issue. Explanation, 1075.
——Transmission-line foundations design of. By G. D Balsille (D), 1324.
——Transmission-line reconstruction. By P. O. Reyneau and H. P. Seelye, *7; comment 2.
——Transmission line troubles quickly located. By F. C. Stanford, *899.
——Transmission systems of the near future. By A. E. Silver, *140.
——Trends in substations and lines. By Alfred Alsaker, 1308.
Vaporization of water, electric (D), 1497.
——Western States of the, Map supplement to May 8 issue. Explanation, 1075.
——Wire for transmission, iron and steel. By R. W. Goddard, 891; comment, 881.
——World's longest line, switching on the, *421; comment, 419.
Trucks. (See Vehicles, electric.)
Turbines, steam:
——Advantages of units rated at 30,000-kva. and more questioned, 397.
——Development, optimistic view of. By Richard H. **Rice, 893.**
——High vacuums in operation. By N. L. Pidgeon, 549.
——Providence 45,000 kw., record run of, 752.
——60,000-kw. unit turned over, *1023.
Turbines, water:
——Features of design in large. By F. H. Rogers (D), 504.
——Runner, new type, *423.
——"Turbines and waterwheels." By Charles H. Tallant, 324.
Turbo-alternators:
——Recent development in. By F. D. Newbury, 132.
——Short circuit tests on 10,000-kva. By E. S. Henningsen (D), *1274.
Turbo-generators:
——Failures of, and suggestions for improvements. By J. Shepherd (D), 559.
——The situation regarding large. By Dr. Louis Bell, *129.
——Ventilation of steam. By George Monson (D), 962.

U

Ultra-violet and visible transmission of variously colored glasses. By K. S. Gibson, E. P. T. Tyndall and H. J. McNicholas (D), 1207.

United States Geological Survey:
——Bituminous coal output, larger totals in, 38.
——Energy production and fuel consumption, figures on, 1447.
——Gets $125,000 for study of power production, 1390.
——Government investigations of power, 132.
——Power figures for October, 626.
——Power production report, 288.
Underground construction:
——Conduit, gaining more speed in laying. By T. C. Ruhling, *999.
——Manhole costs, estimating. By E. E. George (D), 686.
——Thermal conductivity of underground ducts. By Willard S. Wilder, *15, comment, 3.
——Tripod for lowering equipment into manhole. By C. W. Geiger, *1269.
Uruguay:
——Water power development urged in, 946.

V

Vacuum cleaners:
——Bissell Motor Co., 1401.
——With gear-driven brush. Landers, Frary & Clark, 873.
Vacuum-tube:
——Amplifiers, new phenomena discovered by means of (D), 1275.
——Applications, German contributions to theory and practice of (D), 1382.
——Measurements on. By H. G. Moeller (D), 687.
——Multiple-grid. By Schottky (D), 1437
——Standard notations in German literature (D), 687.
Vacuum-tube oscillators, theory of. By André Blondel (D), 618.
Vacuum valve, structure and operation of the. By Robert W. A. Brewer (D), 744.
Vail, Theodore N., death of, *966, comment, 935.
Valuation at present construction costs. Sanford Robinson favors, 1446.
Valve grinders:
——Consolidated Machine Tool Co., 1169.
——Eclipse Valve Grinder Co., 1115.
——Electrically operated automobile. Eclipse Valve Grinder Co., *242.
Vectors, application of, to wiring diagrams. By Lewis A. Terven, *60, comment, 194.
Valves, algebra of ionic. By W. H. Eccles (D), 855.
Vehicles electric:
——Construction, care and upkeep, electric motor vehicles, their. By F. Ayton (D), 172.
——Effect of cold weather on (D), 1015.
——Haulage equipment, selecting electric. By R. H. Bacon, *831.
——Sorage-battery locomotives, care of. By Humphrey D. Smith (D), 799.
——Tractors, industrial, serve to move loads economically, 1137.
——Trucks:
Electric industrial (D), 172.
Industrial, on piers and transfers, operating cost data for, 328.
With motor and rear axle combined. Oneida Motor Truck Co., *49.
Vibrator, the Kapp, and its uses. By K. Perlewitz (D), *171.
Voltage:
——Distribution over a condenser-chain. By A. Schwaiger (D), 799.
——Surges in coils. By W. Rogowski (D), 88.

W

Wagner, Herbert A., *938.
Walker, Dr., heads M. I. T. industrial division, *230.
Washing machines:
——Albaugh Dover Co., *107.
——Cylinder, off-center, Pittsfield Machine & Tool Co., *705.
——Cylinder-type, D. M. Sechler Implement & Carriage Co., *1225.
Washing machines (Cont.)
——For boiling, washing, rinsing and drying clothes, Home Utilities Co., *298.
——Little Giant Washing Machine Co., 1457.
——Of rocker type, Wayne Mfg. Co., 353.
——Oscillating, with screened-end bottom, Surf Mfg. Co., *872.
——Pittsfield Machine & Tool Co., 1225, 1457
——Rocker type, with demountable tub, Wayne Mfg. Co. 411.
——Star Washing Machine Mfg. Co., 354.
——Wash-Kosh Mfg. Co., 1457.
——With centrifugal wringer. Home Utilities Co., *578.
——With combined vacuum and agitation operation. Rue Nelson Mfg. Co., *188.
——With reverse-cylinder action. General Railway Signal Co., *1115.
Water powers. (See also Hydro-electric development.)
——Advocate leaves cabinet, *454.
——Attracts new industries to community, 401.
——Bill:
Conferees again adjourn, 621.
Conferees reach agreement, 1021.
Conference again postponed, 745.
Conference report passes House with large majority, 1103.
Conference, way now clear for, 395.
Is passed by Senate, *1328.
New York senate urges Congress to hurry up with, 968.
Outcome of situation still in the dark, 1441.
Passed by Senate, 227.
Pocket veto "invalid," 1385; comment, 1352.
Possibility of Senate filibuster on, 1153.
——Bills for New York state, 339.
——British Columbia, resources of (D), 392.
——California hydro-electric shortage relieved (D), 563.
——California power shortage less serious 969.
——California, water shortage may cause curtailment of power in, 483.
——Canadian development, possibilities of. By Leo G. Dennis (D), 1206.

——State should develop waterpower, says Governor Smith, 175.
——Transcancasia, hydro-electric possibilities in, 1367.
——Uruguay, development urged in, 946.
Water powers (Cont.)
——Utilization of, recent advances in. By E. M. Bergstrom (D), 742.
——Water shortage brings increase of $1,750,000 in fuel cost, 624.
——Wisconsin, 15,000 hp. development in, 34.
Water-supply system, motor driven. Goulds Mfg. Co., *105.
Waterwheels:
——"Turbines and waterwheels." By Charles H. Tallant, 324.
Weir, improved, for gaging in open channels. By Clemens Herschel (D), 799.
Welders:
——And heaters used in automobile factory, *154.
——Rotatable-head two-spot. Federal Machine & Welder Co., *1401.
——Spot. Automatic Controller Mfg. Co., *928.
——Spot, automatic, for pressed-steel channels. Federal Machine & Welder Co., *1456.
Welding, electric:
——Arc:
Automatic metal feed for. General Electric Co., *578.
By F. A. Anderson (D), 686.
Machine, improved. Electric Arc Cutting & Welding Co., *49.
Metal deposition in, I. By O. H. Eschholz, *1473; comment, 1464.
——Companies combine 285.
——Electrode, coated. Electric Arc Cutting & Welding Co., 107.
——Electro percussive. By Ethan Viall (D), 31.
——For future shipbuilding, belief expressed in, 1159.
——Handle for electrodes. Electric Arc Cutting & Welding Co., *187.
——Helmet, apron and gloves for operators. Electric Arc Cutting & Welding Co., 299.
——Outfit, single operator. Westinghouse Electric & Mfg. Co., *1456.
——Structural steel work. By H. B. Payne, *1421; comment, 1409.
——Training course to be developed, 1023.
——Year of preparation in. By Prof. Comfort A. Adams, 320.
Western Association of Electrical Inspectors meets, 284.
Western Electric Co.:
——Issues $25,000,000 five-year bonds, 859.
——1919 sales below war period, 750.
Westinghouse Electric & Manufacturing Co.:
——Additions at Lester to cost $5,000,000, 405.
——Employees, gives insurance, 621.
——Gross earnings $136,052,092, 1280.
——Officials decorated by Emperor of Japan, 1336.
Windings, polyphase. By Rudolpf Richter (D), 742.
Wireless. (See Radio.)
Wires, wiring and conduit:
——Current densities in conductors and cables. By E. Soleri (D), 1014.
——Cut-outs, Ward Electric Co., *242.
——Fish wire, Hatheway & Knott, 354.
——Ground clamp, H. B. Sherman Mfg. Co., 1457.
——Insulator, rubber, for end splices. Elasticap Co., *354.
——Outlet plate, improved. Sterling Mfg. Co., *243.
——Power-station wiring for control circuits. By Ferdinand N. Bechoff, *1310.
——Stripper, wire, France Mfg. Co., *1032.
——Wiring for induction motors. By H. W. Cheney, 324.
